AYURVEDA

Ayurveda is the science of life or self- healing. It is a simple ,practical science of life whose principles are universally applicable to each individual's daily existence. It is a holistic system of medicine that is indigenous to and widely practised in India. "Ayu" means "life" and Veda is knowledge.

Throughout life, there is a ceaseless interaction between the external and internal environment.The external environment interacts with the internal body governed by the three doshas •

Vata-Space and Air

• Pitta-Fire

• Kapha-Water and earth

. A state of health is maintained only if these three doshas are in balance in the human body. The basic principle of healing in Ayurveda is to create balance in the internal forces working in the individual and thus induce harmony between the mind and soul.

SHIVALIK AYURVEDIC
PHARMACEUTICALS
